Charleston, WV 25304

Attn: James Martin

Re: UIC Permit Application UIC2D0190460

This letter is to request a public hearing regarding renewal of an Underground Injection Control Permit for Danny E. Webb Construction, Inc.

It has come to our attention that there are concerns from neighbors about noxious odors and fumes and possible violations of the Clean Water Act from leaks and discharges into the headwaters of Wolfe Creek. Wolfe Creek is an impaired stream listed on the state's listing of impaired waters under Section 303(d) of the Clean Water Act and the source of emergency drinking water for Fayetteville.

Tests reported by Danny Webb show levels of pollutants exceeding allowable limits. The history of Danny Webb's interaction with the Office of Oil and Gas indicates that he is not willing to comply with regulations that protect public health, and we question whether he should be granted a permit renewal and allowed to continue operating the facility.

Please notify us of any further activity on this matter.

Sincerely,

Beth Little
